PROFILE

I'm a passionate Computer Science student at Daffodil International University. Skilled in C, C++, and JavaScript, I thrive in web development using HTML, CSS, and React. I also have hands-on experience managing databases with MySQL and Firebase. I love solving problems and have tackled over 300 questions in Data Structures and Algorithms on various coding platforms.

PROJECTS

Chat App   Live   GitHub

- Built a responsive Chat App with React.js, featuring effective React Routing for view management. Utilized Firebase Firestore for efficient data storage and integrated Firebase Auth for secure user authentication, ensuring data privacy and access control.
- Build with **React.js, Firebase, Tailwind, React Router**

Weather App   Live   GitHub

- Incorporated OpenWeather API into the Weather App for real-time, accurate weather data and utilized geolocation for personalized updates. Implemented live weather search, forecasts, and ensured a responsive design for optimal user experience across devices.
- Build with **React.js,Tailwind, OpenWeather API, Redux Toolkit**

Todo App   Live   GitHub

- Developed a collaborative Todo App with real-time task management, allowing concurrent editing and instant synchronization across devices. Integrated robust Firebase Authentication for secure user data access, account creation, and personalized task lists. Designed a responsive interface for optimal user experience, utilizing Firebase's real-time database and authentication services as the project's core.
- Built with **HTML, CSS, JavaScript, and Firebase.**

Protfolio Website   Live   GitHub

- Build a portfolio journey with a showcase of diverse web development projects. Connect with me via social links or drop a message in the contact form for collaboration and inquiries. Let's bring your ideas to life!
- Build with **React.js , Tailwind**
